

# RUST PREVENTION PROGRAM

## CLEAN. PROTECT. MAINTAIN.

EXPERTISE THAT PARTNERS WITH YOU

### 1 CLEAN

#### ZEP T'N'T

##### Brushless Truck and Trailer Wash

- Liquid truck and trailer wash formulated to remove exhaust deposits, road film and bug residues from painted vehicle surfaces in one application without brushing
- Contains no phosphates, caustics, acids or solvents, and its synthetic, biodegradable detergents rinse fully to eliminate streaking
- Can be applied with high or low pressure and in hot or cold water; for best results apply with high pressure and hot water, and rinse with high pressure
- Dilute up to 1 to 25 parts for heavy-duty cleaning
- No manual brushing required in most cases

- 37624** (4-1 gal/cs)
- 37635** (5 gal)
- 37685** (55 gal)
- 37689** (275 gal)

### 2 TREAT

#### ZEP RUSTARRESTER

##### Rust Conversion Coating

Chemically converts existing rust and corrosion into a moisture-free, black protective coating. The resulting surface is then ready for painting or other treatment without additional priming. Water-based. Non-flammable. USDA applicable, P1.

- Eliminates rust
- Prepares surfaces for painting or protective coatings

- 146824** (4-1 gal/cs)

#### ZEP RUST REMOVER

##### Removes Rust, Oxides, Tarnish, Soil and Heat Scale

the toughest rust infestations, ensuring that your tools and machinery regain their original luster. Its fast-acting formula penetrates deep to dissolve rust without damaging the underlying metal, making it suitable for various surfaces. It restores function but also extends the life of your equipment and tools by preventing further rust development

- 147024** (4-1 gal/cs)
- 147085** (55 gal)

### 3 PROTECT

#### ZEP FORMULA 166

##### Clear, Long-lasting Coating

Experience a clear, long-lasting coating designed to withstand even the toughest conditions! This innovative layer not only shields your gear from scratches and abrasions but also offers excellent resistance against moisture and UV rays, ensuring your equipment remains in top shape.

- Provides a clear, protective acrylic coating
- Restores and maintains surfaces to look like new

- 142935** (5 gal)

### ADDITIONAL SOLUTIONS

#### ZEP IRONCLAD

##### Long-Lasting Metal Protector

- Ready-to-use, solvent-based liquid dries to form a transparent, wax-type protective film that is self-repairing, weldable, and non-combustible
- Provides long-term, indoor and outdoor corrosion protection for ferrous and non-ferrous metal surfaces
- Unique moisture-displacing action permits the formation of a tightly adherent bond on the base metal, even under damp conditions.
- Will not crack, peel or sag from -40°F to 500°F

- 37624** (12/cs - aerosol)
- 136535** (5 gal)

#### ZEP SELIG LINEBACKER

##### Corrosion Protector

- A ready-to-use long-term corrosion protection film in a solvent-based aerosol form
- Dries to a durable, flexible and non-tacky film. Coating can be easily removed with a safety solvent degreaser when desired
- Provides an impenetrable film barrier
- Resists heat, rain, snow, salt water and many corrosive industrial atmospheres
- One can will cover approximately 100 sq. ft. of metal surface
- Film will not crack, peel or sag from -40°F to 174°F

- 37624** (12/cs - aerosol)
